

Running on Borrowed Time?

Upgrade your EZLogic® System with IBT.

It's Time to Upgrade

EZLogic® Gen1 & 2 users, frustrated by unplanned downtime caused by failing parts? Hytrol no longer supplies replacement parts for Gen1 or 2.

As a result, IBT offers two solutions:

1. Replace your entire system with Gen3.
2. Upgrade your system to Gen3 in small sections.

Gen3 System Enhancements

Compatible for both pallet and package conveyor systems, Gen3 is known to increase throughput thanks to these system features:

- ✓ **Dynamic Zone Allocation**
Ability to handle products longer than a zone
- ✓ **Improved Product Flow**
Choose between singulate, slug, or cascaded slug release modes
- ✓ **Expanded Control Options**
Enhanced accumulation and product release features
- ✓ **Robust Communication**
Designed with a 27 volt power supply
- ✓ **Easy Configuration**
Program Gen3 using a laptop or smartphone with a Bluetooth adapter

Who We Help

IBT provides material handling services and support for customers across a variety of industries including:

- Global food corporations
- Leading power provider
- Automotive suppliers
- Pet food brands
- Building material companies
- Small manufacturers
